

Highlights:

- ❖ Suitable for rooms up to 10m²
- ❖ Power consumption Max. 550 watts
- ❖ 1 performance level
- ❖ Heating panel
- ❖ No operating noise
- ❖ Temperature control 0-37C
- ❖ LED display
- ❖ Timer function
- ❖ Automatic Standby
- ❖ Stylish, sleek design

Security

Safety is a top priority for SHX. The heating panel is equipped with an overheat protection, in addition a thermal fuse is installed. In this way, risks are prevented from the outset.

SHX Ceramic Heating Panel

The SHX ceramic heating panel is significantly more efficient, less consumable & more environmentally friendly than conventional electric Heaters.

The maintenance-free ceramic heating panel works like the sun. The heating shafts are transferred directly to any solid material in the room. This saves a lot of energy.

The extreme thin ceramic heating panel (1,1cm) can be easily mounted on the wall with the supplied accessories.

The advantages of our SHX ceramic heating panel at a glance

- ❖ For centuries, people have been heating up tiled stoves and enjoying comfortable warmth. Even our ancestors knew what was good. The tiles of the ovens are made of ceramic. There is a good reason for this: ceramics are the material that has been shown to emit heat radiation most efficiently.
- ❖ Thin ceramic plate, which emits heat very quickly and intensively.
- ❖ Built-in thermostat
- ❖ Ceramics belong to the group of materials that have the best efficiency for heat generation
- ❖ Allergy sufferers friendly

Easy to clean

Thanks to its eco-friendly and well-thought-out design, this IR radiator is very easy to install with the mounting accessories. It is also easy to use and clean.

Adaptable design

The SHX ceramic heating panel can be painted in any color and can therefore be perfectly adapted to the room.

Easy operation on the LCD display

The attached control panel with LCD display and timer allows easy operation and adjustment of the desired temperature and time.

Delivery

- ❖ Manual
- ❖ 1.1 m cable
- ❖ 4 x (plastic dowels) and screw covers for wall mounting

Guarantee

- ❖ 2 years

The attached control panel with LCD display and timer allows easy operation and adjustment of the desired temperature and time.

Thanks to its eco-friendly and well-thought-out design, this IR radiator is very easy to install with the mounting accessories. It is also easy to use and clean.

The special design and the paintable surface can be easily adapted to the environment.

Key point of allergy!

Due to the nature of the heater, the ceramic heating element produces a temperature that does not cause any dust burning. As a result, less particulate matter is produced, which again means that ceramic heating panels are a good solution for heating, especially for allergy sufferers. The ceramic heating panels of the SHX series combine allergy-friendly heating technology with timeless design.

Technical data

- ❖ Suitable for rooms up to 10m²
- ❖ Mains voltage: 220 - 240 volts
- ❖ Max. Power consumption: 550 watts
- ❖ Heating capacity: 550 watts
- ❖ Adjustable heating ranges from 0 °C to 37 °C
- ❖ LED display with temperature sensor indicates room temperature
- ❖ Switch-on and off timer: programmable per day
- ❖ Cost-saving due to low power consumption
- ❖ Auto Standby with the window open (as soon as the room temperature drops by 3°C)
- ❖ Stylish, sleek design
- ❖ 11 mm thin
- ❖ Overheat protection
- ❖ Optimum housing integration - surface paintable
- ❖ High-quality ceramic heating panel
- ❖ Wall
- ❖ Product dimensions (WxHxD): 800x600x11 mm
- ❖ Packaging dimensions (WxHxD): 870x637x53 mm
- ❖ Weight Net / Gross: 7.4kg / 8,5kg
- ❖ EAN: 9 005 665 025 666
