SHX ceramic column heater with open fire

Our SHX ceramic column heater with its simple design and fireplace effect is ideal for generating additional heat on colder days. The column fireplace impresses with its simple design and can be integrated perfectly into all styles of furnishing. In addition, the flame pattern can be switched on individually and brings the fireplace fire beautifully to the fore. The desired temperature can be set with the thermostat of the heater and is shown on the display. With the timer function you can program the SHX fan heater individually between 1 and 8 hours. Thanks to the practical oscillation function, the ceramic fan heater distributes the heat evenly in a few minutes in rooms up to max. 20m².

The most important advantages of the SHX ceramic fan heater with chimney effect at a glance

- ❖ The natural flame pattern of the chimney effect integrates perfectly
- ❖ in all styles of furnishing.
- ❖ High stability
- ❖ Low noise operation
- ❖ Low wind generation, as no strong supply of cooling air is required
- ❖ More durable than other designs
- ❖ Heating wires are insensitive to shocks
- ❖ Less odour, since neither dust nor hair can burn on ceramic
- ❖ **Significantly lower infestation with spores, germs, bacteria and viruses**

Keyword allergy!

Due to the nature of the heating register, the large surface of the ceramic heating element generates a temperature that does not cause any dust combustion. Consequently, less fine dust is produced, which again means that ceramic fan heaters are a good solution for quick heating, especially for allergy sufferers.
