

Highlights

- **High range of 15 metres**
an ordinary stand fan reaches an average of 5 metres
- **Swivel function (oscillation)**
30, 60 or 360 degrees adjustable
- **Two wind modes**
Constant or natural
- **Switch-off timer**
1-7 hours adjustable
- **Super Silent Mode**
Only 32dB at the lowest level
- **Ceiling fan with a difference**
the fan head can be directed towards the ceiling

BE COOL Super Silent Stand Fan 31cm

The **BE COOL stand fan** in a noble design circulates air with a range of **upto 15 metres**. The swivel of the head can be adjusted to 3 levels: 30, 60 or 360 degrees. Furthermore, the head can be moved upwards to blow cool air onto the wall ceiling.

Two different wind modes (natural and constant), each of which can be divided into three speed levels, provide individual cooling. To avoid continuous operation, a switch-off time of **1-7 hours** can be set with the timer.

The absolute highlight is the brushless motor, which is embedded in a high-precision bearing so that the **noise level is reduced by 30%**. The fan is amazingly quiet thanks to its fan blades. These are designed to actively avoid vibrations and reduce the **volume to 32dB** (lowest level) - that's less than a conversation at normal volume!

Brushless motor

The absolute highlight is the brushless motor. This is embedded in a high-precision bearing and reduces noise by 30%.

"Super Silent" rotor blades

The fan is amazingly quiet thanks to its rotor blades. These are designed in such a way that vibrations are avoided. This technology reduces the noise level to only 32 dB at the lowest setting.

Easy operation

A comfortable control on the fan head enables user-friendly operation. However, all functions can also be controlled with the supplied round remote control.

Swivel function (oscillation)

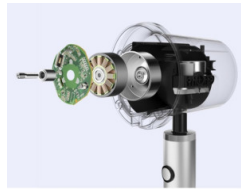

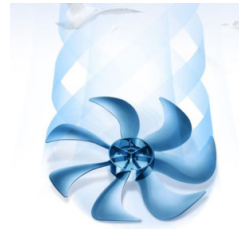

The swivel function can be adjusted in three stages. 30, 60, or 360 degrees - the air is thus optimally distributed to all areas of the room. Furthermore, the fan head can be directed towards the ceiling.

Scope of delivery

- Pedestal fan
- Power supply unit
- Remote control incl. button cell CR2032
- Screws and tools
- Operating instructions

Warranty period

- 2 years

Specifications:

- Power: 20W
- Rated voltage: 24V
- Diameter: 31cm
- 7 rotor blades Super Silent
- Maximum speed 4.3m/s
- Maximum volume: 32 - 58dB (A)
- Wind mode: forest wind (high) / forest wind (low) / sleep wind
- Constant mode: low, medium and high
- Rotation: 30°/60°/360° left and right

Dimensions:

- Product (HxWxD): 1007 x 320 x 320 mm
- Weight: 3.0 kg
