Powerful patio heater from SHX!

The SHXTH2000GF patio heater features the innovative GOLDEN LAMP heating technology. This enables the environment to be heated up very quickly. Thanks to the internal reflector, the patio heater gives off an additional 20% more radiant heat.

The radiant heater can be mounted on the wall as well as on the ceiling. The angle of inclination can be adjusted. In addition, it convinces with its compact and robust structure, which is suitable for indoor and outdoor use.

You can conveniently set the two heating levels with the supplied remote control. This way, you can enjoy the heat comfortably and easily.

The radiant heater is certified with protection class IP 55, so it can also be used outdoors.

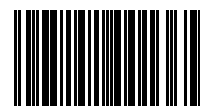

Safety and performance are SHX's top priorities - see for yourself.
