  max. 600 watt power consumption
- **Modern design**
  Blends perfectly into the room
- **Touch controls**
  on the mirror surface
- **Thermostat**
  for setting the desired temperature
- **Timer function**
  with 7-day programme

Optimal for the bathroom

The infrared mirror heater is perfect for your bathroom. The heat-resistant glass and the heating element prevent the mirror from fogging up in damp rooms.

Get cosy and warm quickly

The SHX mirror heater provides pleasant temperatures immediately. The infrared rays act directly on the body without giving off energy to the surroundings!
We find this very pleasant and beneficial.

Due to the low air circulation, allergy sufferers benefit from low-dust air!

You can operate the device directly on the clear touch display, and the timeless design allows the mirror heater to blend stylishly into any environment.

The "Smartlife" or "Tuya Smart" app offers you maximum flexibility.

This allows you to control the heating even when you are on the move!
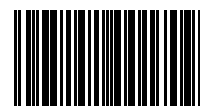

Switch the heating on and off with your smartphone, control the temperature, and also set a switch-off timer if you wish.

In addition, the infrared heater can also be controlled by voice via **Amazon Alexa** or **Google Home**.

Österreichische Marke

This product is only suitable for well-insulated rooms or for occasional use.
Technical changes, errors and colour variations excepted.
