

Highlights

- **Universal attachment** for hoverboards (balance boards)
- **Flexible** the fastening straps allow mounting on many different models
- **Grows with the requirements** Easily adjustable to the body size

With the Sitting Bull, the hoverboard is even more fun.

With a few simple steps, a hoverboard (balance board) is quickly turned into a fun kart. To accelerate, push the levers down and to brake, simply pull them up. Even steering is child's play with the two control levers.

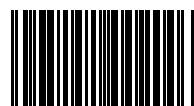

Universal hoverboard seat

The seat can be ideally adjusted to the rider. The double-tube telescopic bar allows flexible length adjustment from 68 cm to 90 cm. The hoverboard kart seat grows with your child!

The bucket seat made of high-quality plastic is comfortable and gives a secure hold.

Compatibility

The hoverboard kart seat can be mounted on all popular 6.5 to 8.5 inch hoverboards (balance boards), e.g. on the BE COOL [BCBB6522RB](#) or [BCBB6522KBK](#).
