

Highlights

- Air purifier**
 The air that is sucked in is washed through the filter. Dust, pollen, mites as well as bacteria and unpleasant odours are thus filtered out of the air.
- Three speed levels**
 low, medium, high
- Climate-friendly operation**
 This type of cooling is a completely natural and cost-effective cooling method. Air coolers reduce the room temperature by means of the natural principle of water evaporation.
- Wind modes**
 Normal, Natural, Sleep
- Swivel function**
 The swivel function optimally distributes the cooled air to all areas of the room.
- Air cooling & honeycomb filter**
 Air coolers draw in the heated room air on one side and then pass it through a honeycomb filter containing cold water as a coolant. The water in the cooling system slowly evaporates and absorbs heat from the room air flowing through. A fan then blows the now cooler room air back into the room.

Refreshing 3in1 air cooler

with air purification and humidification function.

The powerful air cooler provides pleasant cooling in your home.

Thanks to the innovative, natural cooling technology, the device is energy-saving and releases cooled and purified air into the room. Ideal for living areas where an expensive air conditioner is not necessary.

Three speed levels combined with the different functions (cooling, ventilating) give you full freedom over the intensity of cooling.

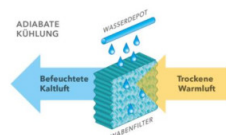

Water tank can be filled on the underside

Cooling batteries

Water tank can be emptied via the closure on the underside

Air cooler Operating principle

- **Air purification & humidification**

In addition to cooling the air, the air cooler differs from conventional fans in that the air is humidified and purified. After the summer season, the unit can also be conveniently used as an air humidifier.

Scope of delivery

1x air cooler
2x cooling battery
1x remote control incl. battery (CR2025)
1x instruction manual

Warranty period

2 years

Specifications:

- 3 in 1: cooling, ventilating and humidifying
- Application area: 15 m²
- Cooling function through atomisation/evaporation of water
- Three wind modes: normal/natural/sleep
- Robust housing with castors
- Swivel function
- Air circulation: 400 m³/h
- Max. Wind speed: 9.5 m/s
- Water evaporation: 1.5 l/h
- Two cooling batteries included
- Water tanks: 20L
- Three speed levels
- 7,5h timer
- Power consumption in watts: 65 watts
- Input voltage: 220V - 240V 50Hz
- Colour: White

Dimensions:

- Product dimension (W/H/D): 370 x 690 x 320 mm
- Gross dimensions (W/H/D): 415 x 760 x 365 mm
- Weight (net/gross): 7.1 kg / 9.2 kg
