

## Highlights

- Large rotary knob, continuously adjustable
- Ideal for dimming table and floor lamps
- Compatible with all dimmable LED lamps from 3-24 Watt
- Increased contact protection

### LED dimming adapter

Adjust the desired brightness of your floor lamps or socket lamps in no time at all. This is infinitely adjustable via the large rotary control.

In contrast to fully electronic dimmers, the brightness set once is retained even when the lamp is switched on repeatedly. The adapter is ideal for dimming table and floor lamps and is compatible with all dimmable LED lamps from 3-24 watts.

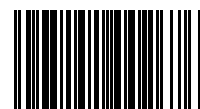

Classic halogen or incandescent lamps from 30-200 watts can also be dimmed continuously. The increased touch protection ensures that you do not have to worry about safety.
