Warranty period

- 2 years

Industrial fan heater 2000 Watt from SHX

The industrial fan heater with an output of 2000 watts and a stainless steel heating element provides fast and effective heating for workshops, garages or storage rooms. With three adjustable power levels (fan, 1000 watts and 2000 watts), this fan heater is also suitable for large rooms and gives you full control over the desired temperature.

The adjustable thermostat allows you to precisely set the room temperature, while the overheat protection with automatic reset ensures your safety. The compact metal housing makes this fan heater robust and durable, suitable for daily use in demanding work environments. The carrying handle makes it easy to transport the unit from one place to another.

Specifications:

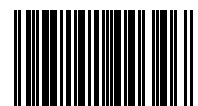

- Max. Power: 2000W
