Sensor light

The sensor luminaire by BE COOL with a colour temperature of 4000K (natural white) creates a pleasant atmosphere in any room. It is versatile in use. Whether in your closet, hallway, staircase, garage or anywhere you need extra light, it will always provide you with the desired comfort.

Operation is simple: just insert 4 AAA batteries (not included) and you're ready to go. No annoying cables or sockets required.
The light offers a brightness of 65 lm±10%, giving you enough light for all situations.

Thanks to the integrated PIR sensor, the light automatically detects movements at a distance of 3-5 metres. The sensor switches the light on for a duration of 20 seconds to ensure that you always have enough time to illuminate the desired area. You can also choose between AUTO/ON/OFF modes to have the control you want.

Installation is a breeze. You can either use the included 3M adhesive tape to mount the light without drilling, or you can opt for the classic method and use screws to securely mount the light. Whichever option you choose, the light will stay firmly in place.

Technical data:

- Colour temperature: 4000K (natural white)
- Operation 4x AAA battery (not included)
- Brightness: 65 lm±10
- Sensor distance:3-5 m
