- **Timer**
  10 hours

4 in 1 air cooler with versatile functions: Cooling, humidifying, ventilating, repelling insects

The air cooler with 50 W output is the perfect solution for keeping your rooms pleasantly cool on hot days. With an air circulation of 480 m³/hour, it provides a refreshing breeze for rooms up to 10 m² in size. This innovative air cooler combines performance and comfort to provide you with a pleasant and cost-effective way to cool your room.

The 7-litre water tank allows hours of operation without constant refilling. With a water evaporation rate of 0.5-0.7 litres per hour, this air cooler provides constant cooling and ensures a pleasant room climate.

With three speed levels, you can customise the cooling to suit your needs. Choose between low, medium and high speed to achieve the optimum air circulation and temperature for your room. The integrated timer allows you to programme the operation of the air cooler according to your needs and save energy.
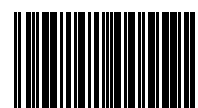

The air cooler is more than just a cooling system. It has a recess for flower pots, which allows you to place your favourite plants and protect them from the heat at the same time. It also contains an insect repellent that keeps pesky insects away and ensures a pleasant and undisturbed environment.
