is easy to operate using the control panel directly on the device or the remote control supplied
- **Mosquito defence**  
Enjoy the summer without annoying mosquitoes

### 2-in-1 pedestal and table fan with mosquito repellent

Summer can be a real challenge with its high temperatures and pesky mosquitoes, but our 2-in-1 stand fan is here to help. With an impressive 55W of power and a generous 43cm diameter, this fan is designed to cool you down on hot days while keeping insects at bay.

With its four speed settings (low, medium, high and eco), you can customise the air circulation to your liking. The control buttons with LED display make control a breeze, and the swivel function and adjustable tilt ensure you always get the perfect breeze.

Thanks to its adjustable height, this fan can be used both as a stand fan and as a table fan, making it extremely versatile.

And if you're worried about mosquitoes, we have the perfect feature for you: simply insert a common mosquito repellent bottle into the attachment provided and activate the mosquito repellent function. So you can enjoy the summer without annoying bites

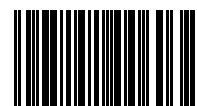

The integrated timer function allows you to set the fan to switch off automatically after eight hours, and with the included remote control you can control all functions from the comfort of your couch or favourite armchair.

as a table fan
