

Premium convector 2200W

SHXPKV2200W

Highlights

- **Powerful**
With an output of 2200W, our convector offers efficient and fast room heating
- **Elegant metal housing**
The elegant metal housing not only gives the convector a robust structure, but also an aesthetic elegance
- **State-of-the-art LED touch control**
The LED touch control enables effortless control of the convector.
- **Smart home integration**
With the WIFI app control, your convector is in your hands anytime, anywhere. Compatibility with Google and Alexa enables seamless integration into your smart home system.
- **Stable base and portability**
The stable base ensures a secure hold, while the metal handle bar makes it easy to carry.

With a rated output of max. 2200W, this appliance guarantees an efficient and reliable heat supply for any room.

The high-quality metal housing has an elegant look that blends seamlessly into any room and adds a touch of luxury. Operation is child's play thanks to the supplied remote control and LED touch panel.

Use the LED touch panel to control the convector according to your individual needs. The touch panel allows you to programme timer functions, adjust power levels and precisely set the desired room temperature.

The convector offers various heating modes that can be flexibly adapted to your needs. Whether you prefer rapid heating or even heat distribution, this appliance makes it all possible.

The convector can be controlled with an app via the integrated WIFI function, while compatibility with Google and Alexa enables seamless integration into your smart home system. Control the heating conveniently while travelling or from your sofa - just as you wish.

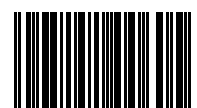

The stable base ensures a secure hold, while the metal handle bar makes it easy to carry. Move the convector easily from room to room and enjoy cosy warmth wherever you are.
