Can produce up to $300\text{ml}/\text{h}$ of cool mist
- **Operating time**
The appliance can be operated for up to 14 hours with a full water tank

Experience premium air quality in your home with our 2-in-1 humidifier and air purifier. This device is designed to revitalise and improve your environment by offering a unique combination of features for maximum efficiency and comfort.

Thanks to its intuitive operation, you can effortlessly switch between humidifier and air purifier modes. This practical function allows you to adjust the air quality with ease and always ensure a healthy indoor climate.

The patented structure produces the finest mist particles of less than $3\mu\text{m}$, which are effectively dispersed in the air to achieve optimum humidity. The built-in H13 HEPA filter with an impressive filtration performance of 99.95% effectively removes pollutants, allergens and particles from the air to provide you with clean and healthy breathing air.

With an airflow of 250m^3 per hour, the air in your room is continuously purified and refreshed. You have full control over the humidity and airflow settings, each with 14 different levels to suit your individual needs.

You can also enjoy the aroma function, which gives your room a pleasant fragrance and creates a relaxing atmosphere. Cleaning and topping up water is effortless thanks to the simple design, while the automatic switch-off protection with low water warning provides additional safety.

The integrated housing design has been developed to minimise noise and ensure quiet operation so you can relax undisturbed. With a capacity of over $300\text{ml}/\text{h}$ of mist and an operating time of up to 14 hours with a full water tank, our humidifier is the ideal solution for your home or office.
