- **Humidification rate**  
up to 300 ml/h
- **Operating time**  
With a full water tank, it offers an operating time of 12 hours

Discover the ultrasonic humidifier - your solution for optimal humidity at home. With its advanced ultrasonic technology, this humidifier provides both warm and cool mist to create the ideal atmosphere.

Thanks to its top-filling design, filling is easier than ever before. The 360° rotation allows you to adjust the mist direction to your liking, while the structured design ensures effortless filling and cleaning. In addition, it is possible to top up the water without having to remove the tank cap.

The humidifier is equipped with an automatic switch-off mechanism that warns you when the water level is low to provide you with safety and convenience. All of this is achieved with extremely quiet operation thanks to the integrated housing design for noise cancellation. Optional silver ion and limescale filters can also be used to inhibit the growth of bacteria in the water and reduce limescale build-up.

With a mist humidification capacity of over 400 ml/h and 7 adjustable mist levels, you can adjust the humidity to your exact needs. And with an impressive operating time of up to 12 hours with a full water tank, you can sit back, relax and enjoy the pleasant room climate.
