

# Premium infrared heating panel with WIFI 1200W

SHXPIRP1200

## Highlights

- **max. power**  
of 1200 watts  
for efficient heat
- **Heating element**  
Carbon Crystal heating  
element with PET surface
- **LED ambient light**  
Provides natural white,  
warm white and cool  
white LED ambient light  
with dimming function
- **Timer**  
24-hour timer  
and weekly timer
- **Safety features**  
Open window detection  
and overheating protection
- **WIFI:**  
with app control
- **Mounting**  
As a free-standing  
appliance or wall  
and ceiling mounting

Developed with the latest technology and highest quality, this infrared heating panel offers an efficient and stylish solution for your heating needs.

The heating panel is made of high-quality Carbon Crystal and has a PET surface that ensures even heat distribution.

The removable thermostat with LED display enables simple and intuitive control of the heating panel. With the 24-hour timer and the weekly timer, you can customise the heating times to suit your daily routine.

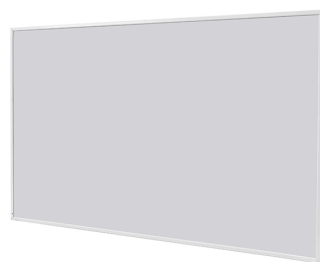

The heating panel has automatic detection of open windows to avoid wasting energy. In the event of overheating, the heating panel switches off automatically to ensure your safety.

Control the heating panel conveniently using the WIFI thermostat control via smartphone app. This gives you full control over your room temperature, no matter where you are.

With the integrated LED ambient light, you can customise the atmosphere in your room as you wish. Choose between natural white, warm white and cool white light and adjust the brightness with the dimming function in four levels (0%, 25%, 50%, 75%, 100%).

The mounting material supplied enables uncomplicated installation on walls and ceilings.

The infrared heating panel combines innovative technology, simple and modern design and first-class performance to offer you maximum comfort and efficiency.
