

Highlights

- **80 watts of power:**
High performance for effective cooling
- **2 litre water tank:**
easy to fill from the back
- **1500 m³/h air flow:**
Efficient air circulation for optimum cooling.
- **Oscillation function:**
Even distribution of cool air in the room.
- **0.25 l/h evaporation rate:**
Efficient evaporation for even cooling.
- **24 hour timer:**
Programmable operation for added convenience.
- **Remote control:**
Convenient control from a distance
- **Ambient lighting**
creates an atmospheric ambience

This high-quality spray mist fan combines powerful performance with innovative technology to efficiently cool the air in the room.

With an output of 80 W, it not only ensures powerful air circulation, but also creates a noticeably cooler atmosphere with its fine spray mist - ideal for hot summer days.

The generous 2-litre water tank, which can be conveniently filled from behind, enables continuous mist generation. The fan distributes an impressive air flow of 1500 m³/h and effectively cools the air. Thanks to the three individually adjustable speed levels and the versatile operating modes, including natural and sleep mode, you can customise the cooling experience to suit your preferences.

The integrated oscillation function ensures that the fine spray mist is evenly distributed throughout the room, while the efficient evaporation rate of 0.25 litres per hour ensures long-lasting freshness without unnecessarily increasing water consumption.

With the 24-hour timer, you can specify exactly when the appliance should switch off automatically - for maximum convenience, even while you sleep. The remote control supplied also allows you to conveniently control all functions from a distance.

This mist fan is the perfect solution for anyone looking for an effective and stylish way to cool their rooms while enjoying the convenience of a modern, versatile appliance.

Scope of delivery

- Spray mist fan
- Remote control
- Operating instructions

Warranty period

- 2 years

Specifications:

- Voltage: 220-240V / 50Hz ~
- Power: 80W
- 2L water tank, can be filled on the back
- 12 wind levels
- Air flow: 1500 m³/h
- Evaporation rate: 0.25 L/h
- Noise level: ≤ 55 dB(A)
- 3 modes: Normal, nature and sleep
- Swivelling function
- Tilt manually adjustable
- 24 hour timer
- 8 rotor blades
- Rotor blade diameter: 350 mm
- With ambient lighting
- With remote control
- Material: ABS, PP
- Colour: white

Dimensions:

- Product (W×H×D): 429×1145×429 mm
- Packaging (W×H×D): 920×460×217 mm
- Net/gross weight: 6.9 kg / 8.4 kg
