

13 kW Infrared Diesel Heater

SHXOBH-13

Highlights

- **Simple controls**
with LED display, touchpad and remote control
- **High-performance**
13 kW heating output
- **low power consumption**
of just 80W
- **Versatile**
for a heating area of 50–70 m²
- **Diesel-powered vehicles**
Use of diesel as a fuel
- **Low-noise**
with a noise level of just 45 dB(A)
- **Safety**
with various safety features such as anti-tip protection and flame failure protection

Lieferumfang

- Diesel heater
- Operating instructions
- Remote control

Garantiezeit

2 years

The **OBH-13** infrared diesel heater is a powerful and efficient heating solution for large indoor areas such as halls and garages.

It operates using infrared radiation and ensures even heat distribution across areas of up to 70 m². It is easy to operate via the LED display with touchpad or the remote control. Thanks to its 360° castors, the heater can be positioned flexibly within the room.

For maximum safety, the OBH-13 is equipped with a 45° anti-tilt mechanism, a flame failure safety device, a low-oil-level alarm and overheating protection.

With an output of 13 kW, the infrared diesel heater provides reliable and efficient heat for large-scale applications.

Specifications:

- Rated power consumption: 80W (220V / 50Hz)
- Output power: 13 kW
- Heating area: 50–70 m²
- Fuel: Diesel
- Fuel consumption: 0.95–1.14 l/h
- Noise level: 45 dB(A)
- Tank capacity: 50 litres
- LED display with touch control panel and remote control
- Full manoeuvrability thanks to 360° wheels
- 24-hour timer
- 45° anti-tip protection
- Flame failure safety device
- Alarm for low oil level at the base Overheating protection

Dimensions:

- Product (W×H×D): 950×990×305 mm
- Packaging (W×H×D): 980×1030×350 mm
- Net/Gross weight: 44 kg / 50 kg
