

Highlights

- **Powerful 4600 W heating output**
Fast and efficient heat for outdoor areas, workshops or construction sites
- **Operation with propane / LPG gas**
Flexible use with commercially available gas cylinders
- **Efficient infrared ceramic heating**
Direct heat transfer to people and objects
- **Robust metal construction**
Sturdy frame for a secure stand and long service life
- **Protective grille for more safety**
Protects against direct contact with the heating surface

Lieferumfang

- Gas radiant heater
- Operating instructions
- Pressure regulator
- Gas hose
- Stand with fixing screw

Garantiezeit

- 2 years

The **4600 W gas heater** is a powerful and mobile heating solution for use outdoors, in workshops, construction sites, garages or well-ventilated work areas. Operating on **propane or LPG gas**, the appliance quickly and efficiently provides pleasant warmth exactly where it is needed.

The heater works with an **infrared ceramic heating plate** that emits heat directly to people and objects. As a result, the energy is utilised particularly efficiently and a rapid heating effect is achieved.

Thanks to the robust **metal construction with a stable base frame**, the gas heater is durable and easy to transport. The integrated protective grille ensures additional safety during operation.

With a heat output of **4600 watts**, the device is ideal for temporary heating solutions at outdoor events, terraces, camping, construction work or in open storage areas.

Specifications:

- Heat output: 4600 Watt
- Gas type: Propane / LPG
- Heating area: 45m²
- Gas consumption: 0.34 kg/h
- Working pressure: 50mbar
- Nozzle size: 0.9 mm
- Heating technology: Ceramic infrared burner
- Ignition: Manual
- Robust metal construction
- Stable base frame
- Protective grille for increased safety
- Application area: Outdoor area / well ventilated areas

Dimensions:

- Product (W×H×D): 320×360×220 mm
- Packaging (W×H×D): 355×155×285 mm
- Net/gross weight: 1.8 kg / 2.4 kg
